Asked by the British "Bandsman, Local Officer, and Songster" as to reasons for the dearth of applica-tions for Officership from young people, Lieut.-Colonel Hilliary said:

"The commonest reason to my mind, though the one very rarely stated, because it is a base one, is the thwillingness to suffer and to make the sacrifice. They are afraid they may not be so well off. Whereas may not be so well off. Whereas that is the very central principle, the very vital essence, of our religion. The man who has not learned to acrifice has really not yet tasted the the sweets of religion. Self-sacrifice and pure, happy, peacegiving religion are one and indivisible. Our very shatton is founded on the greatest act of sacrifice in the universe."

"The Salvation Army (says "The Whig," Kingston) has now one of the finest huildings in the city. It is very near throughout and is laid unit well."

THE MAN WHO DRINKS

"The oply course to be taken for personal gafety with regard to strong drink is to entirely abstain from its use. If not used at all it cannot be taken to excess." These are the words of The Army's Founder to his Soldiers, every one of whom must be a total abstainer or cease [50, be a Soldier, and they apply with count force to every other reader. to be a Soldier, and they apply with equal force to every other reader of The War Cry." converted or unconverted. That elemental fact calls, indeed, for no argument; all that is required is that, the rule should be vigorously enforced by employers and men in authority

Lef employers of labour generally follow the excellent example of the proprietors of the United States rail road who recently dismissed one hundred and twenty-six men for persistence in drinking intoxicants after they had been warned of whal consequences of such persist ence, whether on or off duty,

It is, of course, hard on the men. strin, of course, hard on the men, space of whom have grown old in the rervice, and harder, still for few wives and children; but the man who will, after warning, risk the tives of hundreds of passengers rather than deny himself the plea-tures of the cup, its entirely with out excuse. is cause for sincere rejoicing throughout the Territory, and wherever he is known, that the Commissioner is making uninterrunted progress towards recovery. As suggested last week, he has now left the Sanitarium, and he snent, before departing for a health resort, a comple of days in Toronto.

"The War Cry" had therefore the joyful satisfaction of seeing for itself that the Commissioner is new looking more like himself than for months' past. There is sparkle in his eyes, grip in his hand, tone in his voice, and something like the old vivacity in his whole being. For which, let us all thank God

"I am slowly but surely coming up the hill," said the Commissioner, greetings over. "My three weeks at the Sanitarium have given me great satisfaction, as well as benefit; for the doctors who saw me before when I was in normal health, have now seen me again, and they tell me I am making a remarkable recovery. Their various examinations and tests confirm that opinion

"It would, however, be fully of me to disguise the fact that I am still from time to time forcibly reminded that I am just recovering from a long and serious illness. But then you know my difficulty has always been that I have more energy than strength, I was able to take three half-hour walks a day at the Sanitarium, however, and the doctors were very pleased with my progress,"

"And your future morements, Commissioner will be?"

"And after that, Commissioner?"

"Well, The General has wished that I should go to England. When he was here I was too ill to attend to any husiness, and there are important matters affecting the Territory about which he is auxious to see me. He has kindly left the date of my crossing to the doctors and myself, only intimating that I should make the journey as soon as it is convenient.

"The doctors say it will be quite safe for me to start about the third week in February. I don't expect to stay in England long-probably not more than a fortnight. That should bring me back to the Territory by about the third week in March; and by then I hope to be able to return to duty-not at once in my full vigour, perhaps, but, I trust I shall be able to take my place with the Chief Secretary, the Divisional Comable to take my place with the Units Secretary, the Divisional Commanders, and Headquarters Staff in rolling, the old chariot along, I sessore you I shall hall that day with great delight, for I have proved that it requires more grace and patience for so than to work.

him of marvel or surprise.

There were five children in alltwo sisters and three brothers, but one sister was carried home by the augels when still a little flower—she had bloomed here for two summers and Gideon cannot remember This youngest brother Murray was his principal family ch was his principal family chum. There was three or four years' dif-ference in their ages, and Gidean was naturally something of boyhood guardian as well as playmate. Togyardian as wen as praymate. In-gether they spient many happy days is together they often went forth in quest of adventure—and found in. Their narcuts, having themselves

Their control of their boys and girls was therefore repressive of. wrong rather than inspirational, in right. And parents will understand how helpless is such an influence, But the father's conversion made, as we have seen all the difference

as we have seen, all the difference.
It young Gideon's scholastic edu-cation should have been slightly wanting in finish, that is certainly wanting in finish, that is certainly not because he did not get started bright and early. When only five years of age he toddled off to school years of age he toddled off to school with his brothers and sisters; but attendance was sufficiently optional to permit of his course of learning to permit of his course of learning being broken hy considerable lauses, which if they wrought havoc with his prospects on examination days, were exceptionally good for his health. So that although his education in hoghood was largely education in horizond was largely elementary, and although he has learnt a good deal more in the school of practical, ereryday experience than erer he acquired from the blackboard, yet the long-days of activity he spend in the open-air did help to make him physically robust and strong—tall and well-lamit like his aucestors on both skles.

Summer and whiter he, breathed the pure invigorating air; he and a chun by the name of Frank bring mostly together. And at such times

there was fun, as well as trouble, 2500.

One winter Frank's lather had hought him a brand new folloggan, and Frank was auxious that Gileon and Frank was anxious that Gileon should go with him to a nearby hill to try it. The snow hay deep upon the ground. The hill, which was supendanisly deep to their boyish maginations, rat down through an apulle orchard, and at the foot, imaginations, can down enrough an apple orchard, and at the foot, crossing their proposed track, was a fairly high hoard for e.

Canadian Exports.

During the month of December the exports of Canada underwent n remarkable increase. The value of domestic produce exported was well brer fifty-five million dollars, an increase of seventeen million dollars over the previous December, or

forty-four per cent.

By far the largest item in the total was the export of agricultural pro-ducts, which stood at \$35,367,942, as against \$22,859,325 in the correcrease being a trifle over \$12,500,000, or nearly fifty-five nor cent. There also was a heavy proportionate in-errase in the export of manufac-tures also of animals and their produce.

Reclaiming the Soudan

Another great irrigation scheme has been commenced in the Soudan by which vast tracts of desert will be reclaimed. It is helicyed it can be made to add enormously to the cotton output of the British Empire
The tract which is to be watered

is known as the Gizra territory. It is known as the Gizra territory, It lies between the Blue and White Miles, helow Khartoum, and con-sists of 1,500,000 acres. The force and flow of the two rivers is suf-ficient to water the entire district when properly harnessed. The pro-posal is to build two dams south of Khartonai, our over each of the rivers. Thus the tract between the streams will be irrigated, while at the same time the force of the water flowing into Egypt will be controlled
